From a (ND)
memo ~~from~~ TO
Jay Crawford
from Neil Knatterud
4/15/81

3. Fargo STP - the letters STP were used as L101
for Sewage Treatment Plant and this was mistakenly
believed to be an oily sludge contaminated with
STP oil treatment. Waste sludge from the Fargo
Sewage Treatment Plant does not meet any criteria
which would place it in a hazardous waste category.
We recommend deletion of this Fargo STP site as
the evidence indicates that "no problem exists".
